NATURAL GAS PIPELINE ENGINEER

ABOUT USDI

Utility Safety and Design, Inc. (USDI – www.usdi.us) provides professional engineering and design, consultation, construction, and operational services for owners and operators of natural gas facilities, including transmission operators, municipalities, master meter operators, and local distribution companies. *We've built our reputation as a flexible partner.* Since 1969 we've served more than 350 systems across the Midwest – some with a single service, others as professional engineers, and still others as operator of record. USDI provides full-spectrum natural gas solutions through 1) up-front consultation, 2) strategic engineering and design, 3) affordable construction services, and 4) total operational support.

JOB SUMMARY & ESSENTIAL FUNCTIONS

USDI is seeking two (2) Natural Gas Pipeline Engineers to perform engineering services related to pipeline design, operation, and construction activities for owners and operators of natural gas facilities. The job will encompass various aspects engineering and design for natural gas installation, operation, and maintenance requirements. Work is typically performed inside and must conform to the strict requirements of state and pipeline safety regulations as well as company procedures. The individual will be responsible for tasks including, but not limited to:

- Coordinate projects among USDI offices, management, clients, regulatory personnel and contractors
- Perform engineering activities relative to the design, operation, and maintenance of company pipeline and related natural gas facilities
- Develop bid proposals, contracts, design specifications, and material lists for natural gas projects
- Develop, review, and update plans, manuals, and forms
- Provide technical assistance to clients and field personnel
- Assist other USDI offices, as needed, with engineering projects and operating obligations
- Maintain Operator Qualification (OQ) certification, as appropriate
- Compliance records and documentation
- Interface with clients on a regular basis
- Understand, review, and comply with state and federal pipeline safety regulations
