ENGINEERING TECHNICIAN – NATURAL GAS PIPELINES OPERATIONS

ABOUT USDI

Utility Safety and Design, Inc. (USDI – www.usdi.us) provides professional engineering and design, consultation, construction, and operational services for owners and operators of natural gas facilities, including transmission operators, municipalities, master meter operators, and local distribution companies. *We've built our reputation as a flexible partner.* Since 1969 we've served more than 350 systems across the Midwest – some with a single service, others as professional engineers, and still others as operator of record. USDI provides full-spectrum natural gas solutions through 1) up-front consultation, 2) strategic engineering and design, 3) affordable construction services, and 4) total operational support.

USDI, is committed to creating a diverse environment and is proud to be an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, genetics, age, disability, veteran status or other characteristics protected by law.

JOB SUMMARY & ESSENTIAL FUNCTIONS

USDI is seeking an Engineering Technician to perform technical services related to pipeline compliance, operation, and construction activities for owners and operators of natural gas facilities. The job will encompass various aspects of natural gas compliance, operation, and maintenance requirements. Work is performed both inside and outside; and must conform to the strict requirements of state and federal pipeline safety regulations as well as company procedures. The individual will be responsible for tasks including, but not limited to:

- Support engineering activities relative to the design, operation, and maintenance of company pipeline and related natural gas facilities
- Work with Engineering Staff to develop bid proposals, contracts, design specifications, and material lists for natural gas projects
- Develop, review, and update plans, manuals, and forms
- Provide technical assistance to clients and field personnel
- Assist other USDI offices, as needed, with engineering projects and operating obligations
- Maintain Operator Qualification (OQ) certification, as appropriate
- Understand, review, and comply with state and federal pipeline safety regulations
- Perform Construction Inspection as needed
